at the end of March 2024*

Since you are aware that I must remain within the limits established by the 12th Level, I can only speak about elements that I am authorised to comment at this time. And these are the following:

During the past four years, the Earth's inhabitants have successfully defended themselves against major physical and manmade attacks: major volcano eruptions and major inundations at sea, chemical contaminations in the air and in potable water, as well as numerous artificial limitations on our means to earn our living and to enjoy human pleasure. Thanks to the collaboration of our spiritual companions and their millions of unseen helpers, we have assured at least another decade of reasonable human existence.

What has remained largely hidden from public view is the massive use of untested and frequently nefarious injections by more humans than the 12th Level had ever expected. Our latest figures indicate that worldwide, 86% received at least one harmful injection, and many had several injections. Consequently, a massive human death toll is expected for the rest of this decade. The current 12th Level prediction is that by the end of this decade, the world's world population will shrink to 2.7 billion humans alive, down from nearly 10 billion at the beginning of the 2020s.

The 12th Level is aware of many serious problems for the 30 years after 2030. However, the excellent prediction is that we will not have a major nuclear war. Afterwards it will be seen how the world population will face the truly major threats that will arise in the 2050s.

Here is the major message that the 12th Level wishes to share with the rest of the world at this juncture: what we have right now, be ready to share it with your loved ones. Spend less time or worry on the future, and share the joy of what you have now.
